

Update –Month of June 2021

#Update Nepal

As the epidemic deepens, so does the chasm between eating and eating!

The lower class workers have a terrible problem of eating and living in the morning and in the evening,

. During the epidemic of Covid-19, the chasm between eating and eating is widening. The lower class is facing severe shortages, while the lower class has accumulated the necessary materials for months. During the epidemic, the daily wage earners and the lower strata of society have lost their jobs. Workers have a problem to make ends meet in the morning and evening.

"There is no support for help here. There is a problem of food and accommodation on a daily wage." It is not possible to pay rent in the city as one cannot get daily salary. The housewife does not give a discount. Many are unable to go home to their villages.

High Light

Most of the people's lost Job because of the lockdown ,

Our Children family also Infected Covid 19

Our Activities Month of June2021
